MAKING YOUR CLASSIC DYNAMICS BETTER

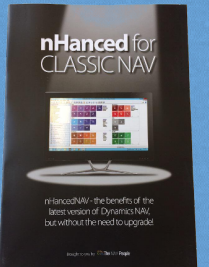

We are
The NAV People
The 365 People

BUT WHY BOTHER?

- If it works – don't break it
- It still can be improved
- You should decide when to upgrade
- Your upgrade should be planned
- You can still have a lot of new modules and improvements
- Users can get used to new functionality

SO, WHERE TO START?

- Technical upgrade to 2009 R2
 - More stable and reliable
 - Works with modern platforms
 - Better performance
 - Web services
- Grab a copy of our magazine
- Add nHanced NAV suite
- Add 3rd-party products

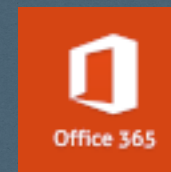

LET'S SEE
ENHANCED
NAV
SUITE

The 365 People

WHAT ELSE CAN I HAVE?

- Mobile platforms (Mobile NAV, Tasklet Factory, Anveo)
- Expense management (Continia)
- Functional Bridge
- Ask nOra
- Azure, Office 365, Power platform

SHOULD I STILL UPGRADE?

- You should think about it
- You should plan it
- Talk to The NAV People

QUESTIONS?

THANK YOU
